

FAASTeam presents:

**Loss of Control! (Keeping the Beast in its cage.) Plus,
experience the Dreaded Vertigo Chair!**

Hank Bruckner, CFI, Hawaii State General Aviation Officer, Airman Extraordinaire, AirShow Pilot, and Aerobatics Instructor will present strategies on maintaining control, avoiding Loss of Control, and when possible, recovering from Loss of Control. CAVEAT/ READ & HEED: This is NOT some get-out-of-jail-free here's-how-to-fix-it thing. Many Loss of Control episodes (viz., base to final) are simply irrecoverable. And, to put it about as gently as possible, these are by their nature also ir-repeatable. At least not by any given pilot. This is another Need to Know Seminar, so if you haven't studied this for a while, this is a vital refresher, so come and please, BRING A FRIEND. Added bonuses (boni ?): refreshments AND your chance to experience our newly-refurbished and highly-dreaded vertigo chair. "You'll laugh! You'll cry!! You'll hurl !!!" Well...we DON'T want you hurling, but it IS a unique experience. Just might give you a whole new respect for "the Leans" and Graveyard Spirals.

Directions: Go up the stairs, to the upstairs classrooms...

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
